REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Claims 1-19 are allowed as the prior art, especially, Cvancara (US 6,414,813), Hanks (US 5,299,075), and Kusumoto (US 2004/0042114), do not teach or suggest the applicant's invention. Claims 1 and 9 teach a method for reducing vibration in disk drive. Regarding claim 1, the distinguishing elements of the claim teaches sensing vibration by the sensor and generating a corresponding sensor data; deriving a statistical sensor (SS) value based on the sensor data, deriving a statistical position error signal (SPES) value from the servo sectors read by the head; comparing the SS value to a SS-threshold value; comparing the SPES value to a SPES-threshold value; and generating a feed-forward command effort signal for reducing the effects of rotational vibration if the SS value exceeds the SS-threshold value and if the SPES value exceeds the SPES-threshold value. Regarding claim 9, the distinguishing elements of the claim teaches sensing vibration by first and second sensors and generating a corresponding first and second sensor data; deriving a statistical sensor (SS) value based on the first and second sensor data; deriving a statistical position error signal (SPES) value from the servo sectors read by the head; comparing the SS value to a Ss-threshold value; comparing the SPES value to a SPES-threshold value; and generating a feed-forward command effort signal for reducing the effects of rotational vibration if the SS value exceeds the Ss-threshold value and if the SPES value exceeds the SPES-threshold value.
